A piece of advice in cross-stitching

- We recommend to stitch on a solid piece of canvas and then cut the details out and sew the sachets.
- Whipstitch 2 side cuts manually or with a sewing machine.
- Make marks on fabrics with stitches: each workpiece has a width of 12 cm, a height of 40 cm (**T1**).
- Find central lines of every sachet and combine it with arrows on the embroidery chart.

- Stitch the bunches and the wide lines of ornament. Strictly follow the chart, so that the ornament is continuous, solid. Bunches are stitched only at one side of sachet.

• **Cross-stitch with 2 strands** of woolen/acrylic yarn or **3 strands** of cotton stranded thread. A woolen/acrylic thread is one and indivisible. Cotton stranded threads consist of 6 thin threads, which you have to detach from moulin lea. The work looks good if all upper stitches are inclined in one direction (**T2**).

RIOLIS

central line

- **Branches** are made with 1-strand stitches of a brown thread.
- Along the upper cuts make 2 lines of fixing cross-strokes (**T3**), leaving 2 cm for a frill.
- Iron the reverse side of embroidery.
- Cut out the sachets, put them together and sew them together, leaving 1 cm for a seam.
- Make a frill at the top by taking out the threads.
- Twist strings of white and beige threads (six 40 cm long threads of each color for a string; **T4**).
